Rx for Survival: Back to the Basics

Good nutrition and clean water are often the keys to a healthy society. Without them whole populations fall victim to infectious diseases and a lowered average life expectancy. In this segment of RX for Survival—A Global Health Challenge we'll look at the basics needed for a healthy life while following two individuals in their mission to change the outcome in developing countries, proving that solutions are indeed possible. One doctor, one engineer, one vision: saving the lives of the world's poor and needy.
