

Master of Science in Clinical Mental Health Counseling 2022-2023 Annual Report

The Council for Accreditation of Counseling and Related Educational Programs (CACREP) requires that programs make certain information publicly available each year.

This report was generated using data and information from Fall 2022, Spring 2023, and Summer 2023. MSMH is an abbreviation for “Master of Science in Clinical Mental Health Counseling”; NR = Not Reported.

Program completion rate is computed based on the retention of students during the specified academic year: (Current students + Graduates) / Total Students.

Employment rate indicates the proportion of students who secured employment within six months of graduation. The credentialing exam pass rate indicates the proportion of graduates who took and passed a counseling licensure or certification exam during the prior preceding academic year.

Past Year Student Data

- Currently enrolled in MSMH: 134
- Graduates in 2022-2023: 37
- Program Completion/Retention Rate: 97%
- Employment Rate: 50%
- Credentialing Exam Pass Rate: 100%

Sources of Data

- Student performance on final internship ratings from instructors and site supervisors.
- Admissions, enrollment, and graduation data from 2022-2023 academic year.
- Systematic follow-up surveys of graduates regarding employment.
- Professional Disposition Evaluations (PDE) implemented annually, as well as within clinical courses.

which was filled in Fall 2022. On August 1,
additional instructor position. Also, on

August 1, 2022, the program filled their open Assistant Professor position by hiring Dr. Sherry Rosenblad, PhD, LPC-S.

- The MSMH faculty continues to engage in quality scholarship including seeking funding opportunities and other activities to increase research and enhance TTUHSC's visibility and reputation.
- Over the 2022-2023 academic year, the MSMH faculty engaged in the following scholarly activities

The MSMH faculty delivered over 42 scholarly presentations through local, regional, state and national platforms.

The MSMH faculty collaborated on 13 publications and submitted 1 interprofessional grant proposal, of which was funded.

The MSMH faculty provided 1,146 clinical service hours and served on 33 school and university, local, state, and national committees

The MSMH faculty are participating in various research projects that have collaborations across the School of Health Professions, TTUHSC, and external university collaborations. Additionally, of the 4 students who have taken their counseling licensing exam (i.e., National Counselor Exam - NCE) as part of the early NCC application process, 4 students passed the NCE on their first attempt scoring higher than the national average on each of the 8 domains.

The MSMH program was named as one of the nation's premier institutions providing a top counseling program going into 2023 (i.e., Best Online Mental Health Counseling Degrees) by EduMed.

Planned Improvements

Planned Improvements:

The MSMH program has begun collaborative efforts with the Office of Interprofessional Education by sitting on IPE event planning committees to ensure programming is relevant to MSMH and CCMH students. Further, MSMH students are being encouraged by the program faculty to participate as facilitators for IPE events allowing MSMH students to gain relevant interprofessional experience, as well as group facilitation and leadership experience.

The MSMH program plans to continue to integrate a stronger emphasis on career development throughout the program to assist students with employment. This will be achieved through implementing career development-focused advising meetings, better advertisement of career development-related resources and workshops offered through the university as well as externally, and increased promotion of the virtual career fairs. Students were encouraged to attend NBCC's annual virtual Career Fair, Counseling Foundations: Your Path to Career Success, on March 9, 2023.

frequency of programmatic and departmental meetings to address student or program concerns more efficiently.

MSMH Program Evaluation Findings

Student Learning Outcome #1

Educational Experiences: Students will develop the knowledge, attitudes and skills necessary to practice as qualified clinical mental health counselors with a diverse population in a wide variety of contexts.

1. Measure: Professional Disposition Evaluation. Professional Disposition Evaluations assess fundamental characteristics necessary for competent professional counseling practice. Professional dispositions are: the commitments, characteristics, values, beliefs, interpersonal functioning, and behaviors that influence the counselor's professional growth and interactions with clients and colleagues. Professional Disposition Evaluation (PDE) assessment occurs annually and within specific clinical courses (Group Counseling, Micro Counseling, Practicum, and Internship) across the curriculum. The term describes fundamental characteristics necessary for competent professional counseling practice. The PDE is completed by instructors teaching clinical courses the semester the student is enrolled, and by all full-time faculty in the department annually.
 - a. Achievement Target: It is expected that 90% of students will receive a 3 or higher across all 9 categories on the Professional Disposition Evaluation (PDE) prior to graduating from the program. Scoring a 3 indicates that the student is developing toward competency, and is meeting the expectations of a mental health counseling student.
 - b. Finding: During the 2022-2023 academic year, 100% of students (n=134)

- a. Achievement Target: The program will receive a mean score of 3 out of 5 on the

the site supervisor. This evaluation tool was developed to meet accrediting standards and to acquire summative feedback on MSMH students' clinical skills.

- a. Achievement Target: 75% of MSMH students will receive a mean score of 3 out of 5 on the Supervisor Evaluation of Student Survey.
 - b. Finding: In the 2022-2023 academic year, of the students who completed practical training, 167 students received evaluations from their clinical site supervisor. Of those 167 students, 94% had a mean score of 3 or higher out of 5.
3. Measure: Site Supervisor Program Evaluation Survey. The MSMH program requests clinical site supervisors to evaluate the program. This survey seeks responses around student readiness for clinical work, professional interactions with faculty supervisors, and responsiveness of programmatic personnel to the needs of individual clinical sites. These evaluations are conducted each semester and used in the overall program evaluation process. Data collection occurs during the HPMC 5360 - Practicum and HPMC 6001 – Internship classes.
- a. Achievement Target: The program will receive a mean score of 3 out of 5 on the Supervisor Program Evaluation Survey.
 - b. Finding: In the 2022-2023 academic year, of the site supervisors supervising practical training, 93 supervisors submitted evaluations of the program. Of those 93 evaluations, 99% scored the program a 3 or higher out of 5 with a mean score of 4.56.
4. Measure: Comprehensive Exam. The Department of Clinical Counseling and Mental Health administers a comprehensive examination near the end of the student's program of study. The exam is a summary achievement exam of counseling curriculum content mastery. The exam contains approximately 200 items and is designed to mimic the National Counselor Exam for Licensure and Certification (NCE).
- a. Achievement Target: It is expected that 60% or more of students will score 70% or higher on the comprehensive exam on their first attempt. NOTE: The program faculty modified the pass rate from AY18-19 of 80% to 70% to reflect more accurately national exam pass rates.
 - b. Finding: During the 2022-2023 academic year, 45 students completed their comprehensive exam. Of the 45 students, 97% scored a 70% or higher on their comprehensive exam on their first attempt.

Student Learning Outcome #3

Students will demonstrate evidence-based clinical mental health counseling practices in clinical training settings.

1. Measure: Professional Disposition Evaluation. Professional Disposition Evaluations assess fundamental characteristics necessary for competent professional counseling practice. Professional dispositions are: the commitments, characteristics, values, beliefs, interpersonal functioning, and behaviors that influence the counselor's professional growth and interactions with clients and colleagues. Professional Disposition Evaluation (PDE) assessment occurs annually and within specific clinical courses (Group Counseling, Micro Counseling, Practicum, and Internship) across the curriculum. The term describes fundamental characteristics necessary for competent

- b. Finding: During the 2022-2023 academic year, 45 students completed their comprehensive exam. Of the 45 students, 97% scored a 70% or higher on their comprehensive exam on their first attempt.

Summary:

Overall, the MSMH program was successful during the 2022-2023 academic cycle. This cycle was the sixth full year for the MSMH program.

The MSMH program met and exceeded all achievement targets for the 2022-2023 academic year. To better serve students and meet the needs of CACREP Accreditation student to faculty ratio, the program opened and filled 2 faculty positions before the Fall 2022 semester.

The MSMH program continued to align with the mission of the university of transforming health care through innovation and collaboration in many ways. First, we continued our enhanced telehealth training for students, continuing our partnership with our training vendor to offer specialized training in tele-mental health counseling. This training was implemented in the Spring of 2021. Now, all MSMH graduates are eligible to receive the Board Certified-Telemetal Health Provider (BC-THM) Credential through the National Board of Certified Counselors.

Secondly, the MSMH program was granted approval through the NBCC for eligible students to submit applications for early National Counselor Certification (NCC).
