

SOM OP: 0.0 , **Electronic Devices in the Classroom**

PURPOSE: The purpose of this course is to provide students with the knowledge and skills necessary to understand and use electronic devices in the classroom. This course will cover the basic principles of electronics, including the use of resistors, capacitors, and inductors, and will also discuss the application of these devices in various classroom settings.

REVIEW: This course is designed for students who are interested in learning about electronics and its applications in the classroom. It is a prerequisite for more advanced courses in electronics and is also a valuable resource for teachers who want to incorporate technology into their classrooms.

POLICY/PROCEDURE:

1. **General.** This course is designed to provide students with a comprehensive understanding of electronics and its applications in the classroom. It is a prerequisite for more advanced courses in electronics and is also a valuable resource for teachers who want to incorporate technology into their classrooms.

2. This course is designed to provide students with a comprehensive understanding of electronics and its applications in the classroom.

The course will cover the basic principles of electronics, including the use of resistors, capacitors, and inductors, and will also discuss the application of these devices in various classroom settings. This course is designed for students who are interested in learning about electronics and its applications in the classroom.

The course will cover the basic principles of electronics, including the use of resistors, capacitors, and inductors, and will also discuss the application of these devices in various classroom settings.
