

# A Post-operative Reaction to Skin Prep Betadine in Postpartum Women

Sanjana Rao, Traci Bartkus DO, Kushal Gandhi PhD, Alex Gibson MS, Gary Ventolini MD

*Division of Obstetrics and Gynecology, Texas Tech University Health Sciences Center*

In modern Obstetrics and Gynecology, C-section is the most common operation in the hospital. Due to continuous rise in C-section procedures, the number of women with postpartum infections is anticipated to increase (1,2)  
Surgical site infections (SSI) following post C-
